

Question 1: Can you explain your experience with Python?

Answer: I have six months of experience in Python. I have basic knowledge like variables, functions and comments.

Feedback: The candidate demonstrates a foundational understanding of Python with knowledge of basic concepts like variables, functions, and comments.

Confidence Score: 40

Strengths: Basic understanding of Python concepts, Willingness to learn and grow in Python

Areas for Improvement: Expand knowledge to include intermediate concepts like data structures, error handling, and file operations.

Plagiarism Suspected: No

---

Question 2: Can you explain the difference between a local variable and a global variable in Python, and provide an example for each?

Answer: Yes, global variables are the variable which is declared globally.

Feedback: The candidate's explanation of global variables is incomplete and lacks clarity. While they correctly mention that global variables are declared globally, they do not provide a clear definition or example.

Confidence Score: 40

Strengths: Attempted to define global variables, Recognized the concept of variable declaration.

Areas for Improvement: Provide a more complete definition of global variables, including their scope and use cases, Demonstrate understanding of local variables.

Plagiarism Suspected: No

---

Question 3: Can you explain the difference between global variables and local variables in Python?

Answer: I don't know.

Feedback: The response 'I don't know' demonstrates a lack of knowledge or preparation for the question, which is concerning for a candidate applying for a Python-related role.

Confidence Score: 20

Strengths: Honesty in admitting lack of knowledge, Potential openness to learning

Areas for Improvement: Improve foundational Python knowledge, Develop problem-solving strategies to handle unknown questions.

Plagiarism Suspected: No

---

Overall Score: 33.33 / 100

Recommendation: Not recommended based on current evaluation.
